### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Norman Soloway (Reg. No. 24,315) on November 6, 2006.

2. The application has been amended as follows:

Claim 21 (Currently amended) An application recovery system for recovering an application from a runtime fault, the application recovery system comprising:

a processor;

an exception dispatcher for receiving an exception caused due to a runtime fault in a thread executing an instruction of a C++ based application, and dispatching the exception to an exception handler;

an exception trapper for trapping the exception before the exception reaches the exception handler when the exception handler is a top level exception handler and causes termination of the application;

an exception translator for translating the exception trapped by the exception trapper into a C++ exception that the C++ based application is capable of handling;

a trapped exception handler for handling the trapped exception, the trapped exception handler having:

Art Unit: 2194

an exception handler selector for determining if there is an application based C++ exception handler that is capable of resolving the exception translated by the exception translator;

a thread terminator for terminating the thread when there is no C++ based exception handler that is capable of handling the translated exception;

a crash recovery manager for calling an application defined callback that supplies application-specific handling which re-executes the instruction and continues at a next line of code of the application; and

an executor for continuing execution of the application.

In claim 24, at line 3, after "an operating system", insert --on a processor--.
